### Customer Problem Statement Template :

The **Visitor Management System** project focuses on digitizing and automating the visitor registration and approval process within an organization. Traditional paper-based visitor logs are time-consuming, prone to errors, and provide limited security. By using ServiceNow, visitors can register digitally, hosts can approve requests, and security personnel can monitor visitor entry and exit in real time. The system improves security, reduces paperwork, and provides complete visitor tracking and reporting.

| Aspect                                                                                                   | Description in context of our project                                                                                                                                                                                    |
|----------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  <b>I am</b>          |  We are ServiceNow developers and IT automation enthusiasts working on building an automated network request management solution.     |
|  <b>I'm trying to</b> |  Build a streamlined way for users to submit network requests and automate the entire approval, fulfillment and notification process. |
|  <b>But</b>           |  Currently, the process is manual and time-consuming, leading to delays, errors, and limited visibility.                              |
|  <b>because</b>       |  Requests are routed through emails and spreadsheets with no automation, proper tracking or SLA compliance.                           |
|  <b>which makes</b>   |  The solution valuable by providing faster request handling, improved accuracy, better transparency, and higher user satisfaction.    |

| Problem Statement (PS) | I am (Customer) | I'm trying to           | But      | Because      | Which makes me feel              |
|------------------------|-----------------|-------------------------|----------|--------------|----------------------------------|
| PS-1                   | I am: A Visitor | I'm trying to: Register | But: The | Because: The | Which makes me feel: Frustrated, |

|      |                                              |                                                                                            |                                                                                                         |                                                                                                 |                                                                                    |
|------|----------------------------------------------|--------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------|
|      |                                              | my visit quickly and receive approval before entering the organization.                    | manual registration process is slow, requires filling paper forms, and often causes long waiting times. | organization uses manual registers and approval is communicated verbally.                       | delayed, and uncertain about my visit.                                             |
| PS-2 | <b>I am:</b> A Security Officer Receptionist | <b>I'm trying to:</b> Record visitor information accurately and monitor visitor movements. | <b>But:</b> Manual records are difficult to maintain, search, and verify.                               | <b>Because:</b> There is no centralized digital system to manage visitor details and approvals. | <b>Which makes me feel:</b> Overloaded, inefficient, and concerned about security. |
